Ahlstrom-Munksjö Milk Filter Media

We are a global leader in the milk filtration market with several years of experience. Today we can offer a complete product range that covers all types of milk filters used globally.

Key advantages of Ahlstrom-Munksjö wetlaid milk filter media

- The **optimized filtration performance** and milk flow rate through the material results in a positive contribution to milk quality and efficient milking process
- **Guaranteed filtration performance** thanks to the wetlaid forming technology
- **High flow rate** through the material
- The **durability** of our milk filter media meets even the strictest market requirements, resulting in no negative surprises for the end user
- The materials are **certified** for food contact safety, resulting in the highest reliability and product safety without compromises
- We focus on high and **consistent quality** and our processes are ISO9001 and 14001 certified. The filtration performance is consistent from one filter to another
- For the converter, the consistent quality guarantees fast and efficient converting with minimum waste, resulting in **cost savings** in filter production
- **Full product range** for all filter types from 30 g/m² to > 150 g/m²

Key terminology and characteristics of Ahlstrom-Munksjö wetlaid milk filter media

- **Filtration performance:** The uniformity and optimized pore structure design of our filter media ensure that they always meet the industry standards for particle retention in milk filtration
- **Flow rate:** Our solutions have been designed for full compatibility with the most common equipment used globally in order to ensure high milk flow and trouble-free milking process for the end-user
- **Durability:** The wet strength of our filter media meet the most stringent strength requirements and ensure full reliability in all conditions
- **Basis weight:** Ahlstrom-Munksjö wetlaid milk filter media product range covers basis weights from 30 g/m² to > 150 g/m²
- **Material safety:** All Ahlstrom-Munksjö wetlaid milk filter media are certified for food contact safety and fulfill the global norms for material safety in filtration of milk

Ahlstrom-Munksjö wetlaid milk filter data

Grade	Basis weight	Thickness	Air permeability	Filter type
	g/m ²	micron	l/m ² /s	
SD0617060	60	455	3400	Sock and tube filters
SD0617080	80	560	2800	Sock and tube filters
SD0600110	110	950	2600	Sock and tube filters

Milk filtration

With more than 30 years of experience in the milk filtration market, we offer a complete product range covering all types of milk filter media used globally.

- Improved milk quality and efficient milking process thanks to the optimized filtration performance and milk flow rate through the material
- Certified for food contact safety, resulting in the highest reliability and product safety
- Focus on high and consistent quality with processes certified at ISO9001 and 14001

Ahlstrom-Munksjö Trinitex® media for milk filtration guarantees optimal performance thanks to its multilayer construction.

The optimized filtration performance and milk flow rate through the material bring a positive contribution to the quality of milk and increased efficiency in the milking process, while the durability of our filter media meets the strictest market requirements, resulting in no negative surprises for the end user.

- High slow rate through the material
- Consistent quality guarantees fast and efficient converting with minimum waste
- Full product range for all filter types from 20 g/m² to 150 g/m²

For the converter, the consistent quality guarantees fast and efficient converting with minimum waste, resulting in cost savings in the production of filters.

We offer a full product range for all types of filters, from 20 g/m² to 150 g/m².

Grade	Basis Weight	Thickness	Air Permeability	Filter Type
	g/m ²	micron	l/m ² /s	
K314 25	25	210	5800	Disc filters
K617 60	60	480	3500	Sock and tube filters
K617 80	80	540	2800	Sock and tube filters
K600 120	120	850	2060	Sock and tube filters
