Baking papers and natural fiber molding materials

Baking and steaming papers for industrial use

Robust performance in humid environments
Grease and heat resistance for impeccable baking
Release properties for easy removal of the stickiest items from baking trays and pans
White or unbleached color options

We offer a range of Genuine Vegetable Parchment and natural grease-proof papers for industrial cooking and baking.

Our range of industrial-grade baking and steaming papers can withstand temperatures of up to 220°C/428°F. They are suitable for industrial usage, ready-to-bake rolled dough (refrigerated or frozen aisle) and dough cans, in addition to tulip cups and panettone papers.

These papers are available in bleached and trulyNatural® fibers

Fresh or frozen rolled pie and pizza dough & cookie pucks

DuraBake®

- Our high density greaseproof solution
- High mechanical properties for trouble-free baking
- Silicon coated for superior release of baked goods or raw dough

Unidough®

- Made from Genuine Vegetable Parchment (GVP)
- A robust and sustainable release solution for rolled dough & food processing that works from the production line to the consumer's oven
- Proud member of the FluoroFree® family
- Certified OK Compost Home and Industrial (EN13432)

Find out more about Genuine Vegetable Parchment technology [here](#).

Pan liners for home use

Hygienic and convenient for all home uses
Release coating for extra performance
Two ranges of products to fit every home baking need

We offer a range of pan liners that allow home users to express their creativity. Adapted for all home uses, our baking papers allow the home cook to bake in a hygienic way and to minimize mess. The release coating helps you to enjoy a no-mess, no-fuss cooking experience.

DuraBake®

DuraBake® is our high-density, greaseproof solution that boasts high mechanical properties for trouble-free baking and a silicon coating for superior release of baked goods.

Pan liners for professional & institutional use

Heavy-duty baking papers adapted for intense usage
Premium release coating for outstanding non-stick properties
Can be reused multiple times when hygiene conditions allow
Specific solutions for institutional users

For professional kitchens, our range of high-density, greaseproof papers allows you to cook and bake with a complete grease barrier and high temperature resistance. Our premium baking papers are certified home compostable and made with our unique Parchment technology. For institutional & commercial users, our versatile, grease proof paper provides convenience and health & safety compliance.

In a professional kitchen

- Our professional baking products have a sturdy, heavy-duty feel that can withstand intense usage.
- Our products are durable and can be reused multiple times without losing their integrity (when hygiene conditions allow).

- They can go from the freezer to the oven without breaking or bursting, or be used wet to preserve GN pans.
- The premium release coating provides great non-stick properties that yield maximum results with your ingredients.
- Our range of liners is available in bleached and trulyNatural® unbleached fibers.

Depending on your needs, our three ranges of products will help the professional cook deliver perfect results every time in a cost-effective way.

- **Grillon®**: Our premium compostable parchment liner can withstand the most intense usage and deliver the most delicate foods with its premium silicone coating.
- **Unibake®**: This parchment product is geared toward everyday professional usage.
- **DuraBake®**: Our silicone-coated, high-density, greaseproof solution for food release, water holdout and grease resistance for all baking applications is optimal for frozen goods during freezing/thawing/baking processes, as well as for confectionary release.

Find out more about our Genuine Vegetable Parchment and other supporting technologies [here](#).

Examples of usage in the professional kitchen:

- Lining GastroNorm pans and baking sheets to minimize cleaning time and avoid Repetitive Stress Injury (RSI)
- Interleaving meats for easy storage in the freezer
- Steaming meats, vegetables and dumplings
- Using as a piping tool
- Lining tools like panini presses to avoid cross-contamination
- Pan-frying delicate foods

Institutional & commercial usage

For commercial and institutional usage, we provide convenience and health & safety compliance.

Biodegradable food trays and molding materials

High temperature resistance, high grease resistance, outstanding wet strength
 High internal bond, no loose fibers
 Biodegradable, certified home compostable, low carbon footprint
 Differentiation: FDA/BfR-approved colors, ink-free patterning, branding & security

Ahlstrom-Munksjö's NatureMold™ is a Genuine Vegetable Parchment-based molding material for environmentally friendly food packaging and bake-and-serve applications.

NatureMold™ is a sustainable molding material with many benefits.

- It is made from renewable raw materials and is biodegradable and compostable according EN 13432 and OK Compost HOME standards (TÜV Austria).
- By design, Genuine Vegetable Parchment provides excellent grease resistance and outstanding wet strength.
- A coating is possible for extra release.
- This versatile material works all the way from food production line to industrial freezer, and from home freezer to oven or microwave to the end-user's table.
- NatureMold™ has a wide recommended utilization temperature range: from -40°C/F to 220°C/428°F.
- NatureMold™ is a proud member of the FluoroFree® family

Converting options

NatureMold™ can be converted as a single layer or laminated with paperboard before converting.

- In a single layer, NatureMold™ is flexible, strong and most suitable for rolled rim converting (up to 150gsm in one layer).
- Laminated with paperboard, NatureMold™ is suitable for thermoforming food trays and containers for ready-meals, pizza, bake-and-serve trays and service counter/deli/takeaway applications.
