Personal hygiene

Depilation

Our complete depilatory strip substrates range provides excellent wax cohesion on the strip, and high shear resistance, preventing the strip to be torn off under operation.

We are able to offer products suitable for both cold and hot wax applications, with an extensive choice of roll dimensions, strip colors and sizes.

All strips are tested externally to ensure optimal skin contact safety.

Benefits

- Easy to convert, no curling (cold wax strips)
- Strips compatible with the majority of waxes on the market
- Controlled permeability
- No delamination
- Soft feel
- Patterned strips range available for both hot and cold wax application
- Ecocert compatible substrates available for both hot and cold wax application

Pharmacy packaging sachets and pouches paper

A wide range of dust free packaging papers for hygienic and sustainable pharmaceutical packaging designed for pills blisters, pills sachets or powder sachets.

- A wide range of dust free papers for hygienic pharmaceutical packaging
- Various solutions for easy identification of pills in a transparent pouch, blisters child-proof and more
- Coated papers with excellent printability and high gloss
- Calendered papers from high transparency to opaque versions
- Heat-resistance for a trouble-free and efficient converting
- Suitable for lamination and extrusion

The pharmaceutical industry demands the highest cleanliness properties for maximum patient safety. Whether it is for pills blisters, pills sachets or powder sachets, all paper solutions developed by Ahlstrom-Munksjö for pharmaceutical applications are dust free and meet the most demanding hygienic requirements.

Highly-transparent pouches for immediate pill identification

For pills sachets, our high transparent Cristal™ paper enables pharmacists and patients to immediately identify which pills are in their pouch. This feature is particularly appreciated by medical professionals in Asia. These small individual pouches are suitable for both automated and manual dispensing machines.

Find out more about our Cristal™ technology [here](#)

Excellent printability to ease identification of medications

When foil laminated sachets are closed by heat-sealing at 250°C, the heat can damage the coating. Our Gerstar™ HDS and Gerbier™ HDS papers have a special coating to withstand the heat. In addition, their excellent printability helps end-users to easily identify different medications.

Wound care

Ahlstrom-Munksjö offers a complete line of nonwovens specifically engineered to be used as a base material for several wound care products, such as microporous tape, absorbent pads, and compression bandages.

Our versatile range meets all your requirements, giving you flexibility and peace of mind. As you would expect from the leading supplier to the industry, our products are manufactured to the highest standards.

Benefits

- **Microporous tape:** fully customizable for any type of adhesive, with several release treatments and colors available. No linting during processing, conformable, hypoallergenic and hand tearable.
- **Compression bandages:** customizable to desired product designs and end-user requirements. Soft to the touch, contributes to proper distribution of compression over the entire bandaged surface.
- **Absorbent pads:** Highly absorbent, skin friendly and easy to laminate with a film.
