Acti-V® Glassine release papers

Acti-V® patented technology
Less catalyst required
Faster curing
Stronger and more stable anchorage

Based on patented technology, Acti-V® supercalendered release papers for silicone coating play an active role in the silicone curing and anchorage process. A complete range of products delivering efficiency and reliability in all release liner needs for PSA labeling, specialty tape, medical, industrial and composites applications:

- Acti-V® is available in substances from 50 to 140 gsm
- Six different colors.
- Acti-V® industrial versions are suitable for silicone coating on both sides.
- Main applications include:
 - PSA label-stock laminates
 - tape, medical, industrial materials and components
- Suitable for all silicone systems: solvent free, solvent, emulsion and UV.
- Can be ordered with FSC® or PEFC™ certification.

Acti-V® and Acti-V® XB unique benefits:

Product	g/m ²	Main application of the liner	Release Paper properties
Acti-V®	55–90	<ul style="list-style-type: none"> Paper and non-paper PSA label rolls for primary Labelling of food, beverages, consumer and durable products. Roll VIP Labelling 	<ul style="list-style-type: none"> High smoothness Optimized density High calliper consistency High transparency for photo-cell detection
Acti-V® XB White	57–78	<ul style="list-style-type: none"> Paper and non-paper PSA label rolls for primary Labelling of food, beverages, consumer and durable products. Highest functional and aesthetical requirements. 	<ul style="list-style-type: none"> Extra barrier for excellent coverage Optimized density and smoothness Highly controlled cleanliness
Acti-™ Light	45-50	<ul style="list-style-type: none"> Speciality application PSA label rolls such as portable price labellers, supermarket scales, corrective tapes. Roll VIP Labelling 	<ul style="list-style-type: none"> Low basis weight/thickness High transparency High caliper consistency
Acti-V® Industrial 2S	62–140	<ul style="list-style-type: none"> Single or double-sided adhesive tapes for household and industrial use. Insulating and soundproofing fabrics, other self-adhesive materials and components for use in automotive, construction, electronic industries. Carriers and interleaves 	<ul style="list-style-type: none"> Treated for silicone coating on one or both sides High mechanical strength suitable for heavy-duty applications High internal bond to withstand high tack of adhesive Tear resistance adapted to specific needs High lay-flat

			<ul style="list-style-type: none"> •High cleanliness •High density
Acti-V® Industrial 2S	62–140	<ul style="list-style-type: none"> •Process carriers during the impregnation of composite materials. •Liners of pre-impregnated fibre composite for application in the final products. 	<ul style="list-style-type: none"> •Supercalendered release paper for silicone coating on both sides. •Guarantees maximum and durable silicone anchorage. •Extremely low silicone extractible. •High thickness consistency. •High mechanical strength. •High temperature resistance. •High cleanliness. •Very high density.
LamiBak™ LamiBak™ L	62–140	<ul style="list-style-type: none"> •Food contact or baking applications. •Lamination of the silicone coated liner to board or cardboard to produce food containers for serving, heating or cooking. 	<ul style="list-style-type: none"> •BFR XXXVI and BFR XXXVI/2 certified for food contact and baking. •Excellent silicone coating performance. •High smoothness. •Specific version designed for back-side lamination. •White or unbleached (Natural) shade.

AVAILABLE COLORS	
For single-side coating	For double-side coating
 White	 White
 Yellow	 Yellow
 TS Yellow	 Brown
 Blue	 Nature
