Coffee capsule filters

Solutions ranging from internal filter to complete lidding solutions
Heatsealable materials for single-use espresso or drip coffee capsules
New compostable product range also available
Can be used in the most common capsule systems

Simplicity in use, high quality results in the cup, and consistent performance, are some of the many reasons why people choose capsule systems. Thanks to our high performance brewing filters, Ahlstrom-Munksjö is capable of satisfying the growing demand for filters dedicated to single serve systems.

- Classic internal filter and compostable internal filter or complete lidding solution for coffee capsules
- Can be used in the most common capsule systems, both for espresso and drip preparation

Our heat-sealable webs support the precise brewing properties of the capsules (pressure, flow rate, temperature).

Already adopted by several leading coffee brands in the world, Ahlstrom-Munksjö offers two filter ranges: classic and compostable.

- The classic line is the reference for the capsule application. Made with a combination of natural and synthetic fibers, our filters perform at the high pressures required for espresso preparation, as well as at the high flow rate needed for drip coffee extraction.
- Conscious of the environmental impact of modern single serve systems, Ahlstrom-Munksjö now offers a new product range focused on compostable solutions. The compostable line is the output of our investment in research and partnerships with international coffee brands to offer a sustainable approach to single serve solutions.

Regulations

All materials used to manufacture these grades are certified in accordance with US FDS regulation 21 CFR176.170 and/or EU regulation 1935-2004.

Our compostable range is compliant with EN13432.

Applications

Our filters can be used in the most common capsule systems, both for espresso and drip preparation. Whether you are preparing a K-cup® or a Nespresso® compatible capsule, Ahlstrom-Munksjö has the solution.

Product line	Application	Basis Weight	Compostability
ClassicPod for espresso	Coffee pod	23-25 gsm	
GreenPod for espresso	Coffee pod	23-25 gsm	Yes
ClassicCapsule filter for espresso*	Coffee capsule	35 gsm	
GreenCapsule filter for espresso	Coffee capsule	23-25 gsm	Yes
GreenCapsule top lid	Coffee capsule	92 gsm	Yes
GreenPouch for classic brew coffee	Coffee bag	16-19 gsm	Yes
ClassicCapsule filter for classic brew coffee	Coffee capsule	25-40 gsm	
GreenCapsule thermoformable filter	Coffee capsule	From 100 gsm	Yes
GreenCapsule filter for classic brew coffee	Coffee capsule	40-55 gsm	Yes
