Coffee pods

Ahlstrom-Munksjö offers the ideal filter web for every coffee application. Designed to suit the changing needs of our customers, our products set the standard for coffee pods.

- Delivers excellent conversion on machines
- Consistent brewing properties
- High dust retention
- High wet strength

Hard coffee pods

By combining analysis of brewing system characteristics with expertise in the perfect espresso preparation, Ahlstrom-Munksjö has developed a high performance filter range dedicated to hard pods application.

Ahlstrom-Munksjö's filters can be processed on the most common packaging machines and ensure the correct extraction conditions in order to obtain the perfect espresso. Flow rate, temperature, pressure and taste are just a few of the key aspects we focused on.

We offer two filters ranges: classic and compostable.

At Ahlstrom-Munksjö we have considered environmental impact at the forefront of product design. We have created a range of hard coffee pods filters made from lightweight compostable materials, characterized by high wet strength and neutral odor and taste.

Regulations

All materials used to manufacture these grades are certified in accordance with US FDS regulation 21 CFR176.170 and/or EU regulation 1935-2004.

Our compostable range is compliant with EN13432.

Applications

Suitable for hard coffee pods.
