Coffee pouches

Coffee pouches are the best way to prepare a hot cup of coffee through infusion. Ahlstrom Munksjö deeply studied the infusion process in order to develop a compostable filter range capable to deliver the best aroma in the cup.

- Fully compostable filter
- Excellent conversion properties
- Light basis weight combined with high strength fibers
- Perfect result in the cup

Our range of filters for coffee pouches is made from 100% renewable materials and is compliant with the compostability requirements set by the European regulation EN13432.

Our webs are made from polylactic acid (PLA). Their neutral odor and taste make them ideal for letting filter coffee develop its flavor.

Regulations

All materials used to manufacture these grades are certified in accordance with US FDS regulation 21 CFR176.170, EU regulation 1935-2004 and EN13432.

Applications

Single serve coffee pouches used for drip coffee.
