Insu-Gard® Building and Construction Papers

No flaming time or afterglow

Controlled char length to 4.5 inches

Sizing to enhance adhesive bonding

Bleached, natural and colored papers available

Natural MG papers provide a smooth surface for lamination to foil as well as in Foil/Scrim/Kraft (FSK) building and construction applications.

Also referred to as XKL® papers, extensible kraft papers provide maximum strength and stretch properties for the most demanding converting applications. Used in a variety of markets and applications, Ahlstrom-Munksjö's XKL® paper is a strong, lightweight sheet capable of withstanding great impact without bursting or puncturing.

- Basis weight range 28–80#
- MD Stretch 6–8%
- MD Stretch 10–12% for heavyweight applications (80#)

Foil/Scrim/Kraft (FSK) facing papers are utilized as a vapor barrier wrap for ducts and pipes. Ahlstrom-Munksjö offers both bleached and natural options, available in machine-finished and machine-glazed surfaces.

Machine-glazed papers offer an ideal smooth surface for foil lamination. With basis weights as low as 11.5# and as high as 50#, we offer the widest breadth of papers in the industry.

Our papers incorporate treatments that minimize corrosion when in contact with metal surfaces like aluminum foil.
